ALASKAN WAY VIADUCT DRAFT EIS

Attn: Allison Ray, WSDOT, Megan Hall, Federal Highway Administration

The attach petitions signed by over one hundred citizens from the Magnolia and Ballard community agree with State Representative Helen Sommers that the BEST alternatives will be the Re-build or the new Aerial.

The petitioners agree that two of the three of the Alternatives are NOT feasible. The all surface Boulevard would be a rush hour nightmare for commuters, business and industry traffic. The four-lane tunnel would eliminate the north portal which is access from Elliott Ave. and exit to Western Ave. and therefore, be closed to all traffic to or from the Regrade, Magnolia, Queen Anne, Interbay, Ballard and further north, including industry along the canal. The six-lane tunnel shows the north portal as an option, not included in the basic design and cost the most.

The petitioners believe only the Aerial or Re-build has the same capacity as the present Viaduct. Capacity should not be reduced, as this will further gridlock I-5 and city streets.

In addition to the petitions, it is my personal opinion that the removal of the viaduct for development will gridlock the city in the name of transportation. It should be noted that Seattle ranks in the highest for gridlock of all major cities in the USA.

The EIS process...."WHO WILL DECIDE WHAT WILL REPLACE THE VIADUCT"....has been compromised by special interest groups.

1. The draft regional transportation package as reported in the Seattle Times twice, on January 22, 2004, "Alaskan Way Viaduct: \$1.1 Billion, mostly to replace Viaduct south of King St. with surface road way"..... April 30th 2004 has "\$1 Billion dollars for the Alaskan Way Viaduct. The Viaduct will be replaced between Holgate and South King Street with surface road".

2. The EIS comment period is not complete until the first of June 2004. **I believe this pre-determination on the Viaduct future is a violation of the rules of law and the EIS process.**

3. Mayor Greg Nickels has publicly promoted the development of Seattle Waterfront without an Alaskan Way Viaduct. **Mayor Greg Nickels shows his Bias and should withdraw from the decisions of the Alaskan Way Viaduct alternatives process.**

4. **Federal and State transportation funds should not be used in an unfair process to take away or diminish this vital Viaduct corridor from the people of Seattle.**

Sincerely,

Eugene Hoglund

April 2004

WASHINGTON'S UNIQUE PRIMARY ELECTION

For 70 years we have enjoyed a range of party choices in our unique "blanket" primary election. The voter could pick a Democrat in one race, a Republican in another, a Libertarian in the third, and on to a Green in yet another.

Almost all other states 1) allow only registered party members to vote in the primary, or 2) make the voter choose the ballot of one of the parties. Louisiana allows choice among all party candidates, but only the top two go on to the general election. So, it is possible to see two Democrats or two Republicans as the only choices—and probably none of the minor party candidates.

Last year the major parties challenged our unique primary in court. The federal court banned our open system, finding that the parties have the right to select their own nominees.

The Legislature approved the "top two" Louisiana model. In case of another court challenge, the bill provided an alternative—"open primary/private choice", where voters choose among candidates of one political party but the choice of party is private.

The Governor vetoed the first alternative. The Governor reasoned that the "top two" alternative was likely to be challenged, and that minor party and independent candidates have the right to bring their diverse views to the November ballot.

In summary, in the September primary you will choose a Democratic, Republican, Libertarian or other party ballot, but you will not be required to declare any party affiliation.

Wash. State Institute for Public
Policy, Board

THE VIADUCT - HIGHEST PRIORITY

In transportation polling, the Viaduct rates highest even among residents east of Lake Washington. The Dept. of Transportation has completed initial analysis of five alternatives. They are: a six-lane tunnel, a four-lane tunnel, rebuild the present structure, a new aerial structure, and a six-lane surface boulevard along the waterfront. Costs range from \$3 to \$4 billion.

I believe two or three of the alternatives are not feasible. The all-surface boulevard would be a rush hour nightmare for commuters, business and industry traffic. The four-lane tunnel would eliminate the north portal (access from Elliott Ave. and exit to Western Ave.) and therefore be closed to all traffic to or from the Regrade, Magnolia, Queen Anne, Interbay, Ballard and further north, including industry along the Canal. The six-lane tunnel shows the north portal as an option. NOT included in the basic design, and is the most costly.

I believe the more likely alternatives will be the rebuild or the new aerial.

Public hearings are scheduled for: April 27, Dome Room, Arctic Bldg., 700 Third Ave., 4 to 7 pm; and April 29, Leif Erickson Hall, 2245 N W 57th St., 5 to 8 pm. Comments may also be sent by e-mail via the website www.wsdot.wa.gov/projects/Viaduct. Make your voice heard.
